

Parent Guide 2018

Everything you need to support your child with their higher education choices

What is UCAS?

UCAS is a charity that processes applications to study full-time courses at universities, colleges, and conservatoires in the UK.

However, it's not just about processing applications – UCAS' aim is to help students make informed choices that are right for them, by guiding them through the entire higher education application process and beyond. To support this, UCAS provides a wide range of valuable information and services for applicants, their parents, and teachers.

Your son or daughter can use www.ucas.com to find out how to get started, research their options, make their application, and track its progress. There's information especially for you at www.ucas.com/parents, including details of the application process, a host of helpful video guides, and a link to sign up for our monthly parent newsletters.

UCAS

What is Which? University?

Which? University is a website designed to help students make the right higher education decision for them, and is brought to you by the consumer champion Which?. It's free, independent, takes no advertising, and brings together all the official facts and stats about degree courses, combined with unbiased expert advice and analysis.

Head to www.which.co.uk/university to explore the website and sign up for our free email alerts at www.which.co.uk/parentemails, packed with timely advice ahead of key decisions.

About the Parent Guide

As a parent, guardian, or someone with care responsibilities, you're likely to be one of the most important and trusted sources of information and advice to your child. With that in mind, UCAS and Which? have joined forces to bring you this guide.

It's designed to give you the tools to guide and support a young person applying to study at university or college in 2018, through their decision-making and the UCAS application process.

If you have any questions, find out how to get in touch at www.ucas.com/contactus.

UCAS terms explained

Throughout the application process, you'll come across a number of terms that you may not be familiar with. Go to www.ucas.com/ucas-terms-explained to find out what they mean.

Key dates at a glance

TIP:

Encourage your son or daughter to leave contingency time before the UCAS deadline in case something goes wrong, for example, loss of internet access, card payment failure, or if the reference isn't added in time. If your son or daughter is applying through their school or college, it will be a member of staff who sends their application to us.

2017

9 May:
Courses starting in 2018 are available in the UCAS search tool.

23 May:
UCAS Undergraduate Apply – the application system for those applying to courses starting in 2018 – becomes available for registration only, allowing your son or daughter to start filling in their application.

6 September:
Completed applications can be paid for and sent to UCAS. Applications can't be sent until all sections are complete, the reference is added, and the application fee has been paid.

15 October (18:00 UK time):
Deadline for applications to the universities of Oxford and Cambridge, and for most courses in medicine, dentistry, and veterinary medicine/science. An application can still be sent after this date, but the universities and colleges concerned cannot guarantee they'll give it equal consideration.

2018

15 January (18:00 UK time):
Deadline for most undergraduate courses. An application can still be sent after this date, but the universities and colleges concerned cannot guarantee they'll give it equal consideration.

25 February:
Extra opens (see page 26).

24 March (18:00 UK time):
Deadline for applications to some art and design courses. An application can still be sent after this date, but the universities and colleges concerned cannot guarantee they'll give it equal consideration.

30 June (18:00 UK time):
Last date for receipt of applications. Applications received after this deadline are automatically entered into Clearing (see page 29).

4 July (18:00 UK time):
Extra closes.

5 July:
Clearing vacancies shown in the UCAS search tool.

Early August:
SQA results day.

16 August:
A level results day.

20 September (18:00 UK time):
Final deadline for applications to courses starting in 2018.

Further dates are available at www.ucas.com/key-dates.

How to pay for uni

One of the biggest concerns for students and their parents is the cost of university. Here's a breakdown of what you need to know about fees, finance, and repayment.

This information has been provided in association with Student Loans Company.

Tuition fees

Your son or daughter will typically pay up to £9,250 per year in tuition fees as a UK student, though for many courses it's less, with the average at around £8,500.

Fees don't need to be paid upfront. Students can apply for a tuition fee loan to cover all or part of their fees.

Because of the way the system works (see the 'Repayment' section), taking out a loan yourself to cover the cost of fees and avoid your child getting into debt will almost always work out more expensive in the long run, so it's not advisable.

Living costs

The second loan they can apply for is the maintenance loan, to help towards living expenses while at university, such as accommodation, food, and course materials.

The amount they're eligible to borrow depends on several factors, including where they will be studying and your household income. You'll need to declare this information to receive the maximum amount available.

For example, if they'll be living away from home (outside of London), a maintenance loan of

up to £8,430* per year could be available for households earning £25,000 per year or less. If you're earning more than this, the loan amount your child is eligible for will be lower, meaning they or you will need to make up any financial shortfall.

Student loans are only repayable after graduation, once your son or daughter is earning over a certain salary.

Extra support

Grants are no longer available, but there is extra support available in certain circumstances.

- **Scholarships and bursaries** – offered on the basis of academic ability, following means testing, or for other reasons (for example, if your child has a disability).
- **Fee waivers** – these reduce tuition fees, either on their own, or in a broader package of support with a bursary.
- **Hardship funds** – these can help if your child is struggling financially, either before or during uni.

If your son or daughter has a disability, including a long-term health condition, mental health condition, or specific learning difficulty, such as dyslexia or dyspraxia, they might be able to get Disabled Students' Allowances (DSAs) to help cover any extra costs they may have. How much they can get depends on their individual needs, not your household income. DSAs should be applied for via student funding bodies, and they don't have to be paid back unless your son or daughter leaves their course early.

Applying

There's no need for your son or daughter to wait to receive offers back from universities to apply for student finance – they can usually do this from February with the student funding body for where they currently live (see 'Location matters').

To make sure they receive their loans on time, remind them to provide their supporting evidence and send off their signed declaration as soon as possible!

Supporting your child's application

If your son or daughter is applying for student finance that depends on your household income, you'll need to give the Student Loans Company (SLC) some financial details, such as your National Insurance number and details of your household income.

To do this, you'll need to create an account at www.gov.uk/studentfinance if you live in England, or www.studentfinancewales.co.uk if you live in Wales. The SLC will confirm this information with HMRC and use it to work out how much student finance your son or daughter can get. In some cases,

they might need to contact you to ask for specific evidence of your household income – this could include photocopies of your P60 or tax return. Don't worry if this happens – it's just part of their checks to make sure your son or daughter gets the funding they're entitled to. Once they've finished with your documents, they'll securely destroy them.

Repayment

Importantly, this isn't based on how much your child has borrowed, but instead on how much they go on to earn.

Currently, the earnings threshold is set at £21,000 for English and Welsh students (£17,775

for Scottish and Northern Irish students). This is the point at which they'll begin to pay back an amount, currently 9%, based on what they're earning over that figure per year. Earning less than that? Then they won't pay anything back.

Once your son or daughter starts repaying their loan, it will be automatically collected through PAYE, so they won't be able to fall behind on their repayments.

While the loans do accrue interest, any outstanding debt still owed after 30 years is written off, meaning it's not always worth helping your child pay back their loan early. Student loans won't appear on their credit file either. Which? University can help you help your son or daughter get on top of student finance, budgets, and money matters. Head to www.which.co.uk/studentfinance to find out more. The Student Loans Company's quick start guide – www.slc.co.uk/repayment – has more information about how they'll repay their student loan, how much they'll repay, and the interest involved.

Location matters

We've mainly covered the system in England, but if you live elsewhere in the UK, the fees, loans, repayment, and cost of living will be different. If your son or daughter lives in:

- **England** they could pay up to £9,250 in tuition fees. Apply to Student Finance England at www.gov.uk/student-finance.
- **Scotland** and goes to a Scottish university, they won't pay tuition fees. Apply for maintenance loans via the Student Awards Agency Scotland at www.saas.gov.uk.
- **Wales** and goes to a Welsh uni, they can get a Tuition Fee Loan to cover the fees charged. Apply to Student Finance Wales at www.studentfinancewales.co.uk.
- **Northern Ireland** and studies in NI too, they'll pay £3,925 in fees. Apply to Student Finance NI at www.studentfinancenl.co.uk.

*Based on 2017 maintenance loan figures. Figures are likely to change for 2018 entry.

Planning their future

Teenagers can be temperamental at the best of times, so how do you broach the touchy subject of their post-school plans?

Subject ideas

A few light conversations over dinner or while watching TV, as opposed to an intimidating sit down talk about 'the future' is probably the best way to get them thinking about their next steps.

If that step is university, but they're struggling to get inspired by a particular subject, try to get them thinking about potential areas of study, in terms of:

- **a subject they study now**
If it's the subject they love and are best at, get them to consider whether it's going to keep them interested for the next few years, and which career path(s) it might lead to.
- **a subject related to a career**
If they already have more vocational ambitions, explore together whether they need to study a particular degree subject in order to get a job in that field, or if the options are more flexible.
- **a completely new subject**
Of course, there are many degree-level disciplines they won't have encountered in their studies before. Assess their suitability for these with an open mind, relating each back to what they enjoy and how they learn best.

Early decisions

The decisions your child makes early on, even as far back as GCSE (or equivalent) options, can have an impact on what – and where – they end up studying for their degree. Some extra thought at this stage could pay off later down the line.

It all depends on what they want to do in the future, but their GCSE-level grades may determine the sixth forms open to them and the qualifications they take next.

Most university courses have minimum GCSE entry requirements in English and maths.

Choosing A level (or equivalent) options

When they know what degree they're aiming for

If your child has an idea of what they want to study, they can look at entry requirements specified by universities that appeal to them.

Look at a handful of different courses to make sure they're ticking all the boxes with their subject choices.

Remember, they won't be able to apply to certain courses without having taken specific qualifications, e.g. GCSE Chemistry may be a requirement for medicine courses.

When they're still undecided about university

It's not unusual for young people to be unsure about their future at this stage, so try not to worry! Encourage them to keep their options open by selecting commonly asked for subjects in university entry requirements. These are known as 'facilitating' subjects, and include the sciences, English, geography, history, maths, and languages. And if they have a talent for art, design, or music, taking the relevant A levels will help them to pursue these subjects further. If your son or daughter is currently studying A levels and looking for ideas on what to study at uni, point them towards www.which.co.uk/alevelexplorer – it helps students discover degree options based on different subject combinations, powered by what other students went on to do.

Note: this advice applies to all advanced level qualifications, including Highers, the International Baccalaureate (IB), and BTECs.

What about BTECs?

Most universities and colleges accept BTEC students, including many competitive universities. Those achieving good grades can be just as sought after as students with good A level grades, and can be better prepared in terms of the independent studying that's required at degree level, due to the portfolio-based nature of BTECs. But it's important to research each course – not every BTEC is acceptable for every university or course.

Be a positive sounding board

Being pushy or putting pressure on your child to follow a certain career or degree path can (and probably will) be counterproductive.

Keep the conversation positive, focusing on your child's current strengths, interests (academic and outside the classroom), and aspirations. Recent predicted grades, report cards, and parents' evenings can work well as practical prompts to help identify what these are together.

Encourage your son or daughter to speak to teachers, careers advisers, and other family members for an alternative perspective.

Alternatives to university

If university isn't the answer (or at least not right now) there are other options to consider.

Apprenticeships – on-the-job experience and training for a whole range of career paths, including finance, retail, IT, and childcare (see page 14).

The world of work – get them to develop their CV, check out job ads, and speak with recruiters to get a sense of different job markets, including school leaver programmes.

Deferred entry to university – spend time gaining work experience or completing a gap year to build up skills, knowledge, and confidence before higher education.

Test out those interests

Perhaps they've already mentioned a few areas they're interested in. Try to get them to put these to the test early on, where possible.

Work experience placements, university taster days, volunteering, or part-time work might offer some fresh insights on their ideas (see page 8).

Get them inspired with tips, stories from other students, and step-by-step advice on choosing a degree course at www.which.co.uk/degrecourse.

Help your child stand out from the crowd

There's a lot more to a university – or job – application than academic achievements.

Admissions tutors and employers want to see how applicants have built up skills and experience outside of their studies too.

Work experience and internships

Before uni

Work experience looks great on personal statements, but only if your child can reflect on what they learnt from it and how it's relevant to the course they're applying to (see page 18).

Work experience doesn't always have to be in a relevant industry or blue chip firm – at this stage, just gaining some experience in an actual workplace is more important.

Using a real work experience example to answer the all-important question 'why should we give you a place on this course?' is bound to impress. For those looking to study medicine, for example, work experience that shows an interest in caring professions would be valuable – like nursery, preschools, or care home experience.

At uni

According to the Association of Graduate Recruiters, an average of 45% of placements or internships lead to a graduate job, although interns typically have to reapply, and 60% of employers have the same selection process for graduates as they do for interns. Getting some professional experience, ideally relevant to your child's chosen industry, will be looked upon favourably by employers, and will help them decide if a particular career is right for them.

Part-time work

Before uni

Even a Saturday job in a shop can demonstrate potential to admissions tutors. Encourage your child to be specific and describe a situation they've dealt with. How did they handle the situation? What did they learn? Get them to keep it relevant to the course and describe how the skills link to their degree work. If they've developed strong communication skills as a result of interacting with customers, they should mention how they would put them to good use when presenting ideas in seminars, for example.

At uni

A part-time job, even one behind a bar or in a shop, can equip them with transferable skills, show they can juggle it with their studies, and help cover living costs.

Volunteering

Before uni

Doing voluntary work at a younger age shows that an applicant has drive. It is often a good way of building up communication and interaction skills too, so help your child reflect on these in their personal statement.

At uni

Volunteering could give your son or daughter the opportunity to gain more hands-on experience in a particular role than they would in a part-time job, or even through work experience. Many smaller charities are willing to give students more responsibility, as they don't have the funds for lots of paid staff.

Clubs and hobbies

Before uni

Talking about other interests or hobbies helps inject some personality into their statement.

Key points

- Draw on how each experience helped them to learn, and how it's relevant to what they're applying for. Working in a supermarket can do this just as well as a high-flying internship.
- Make sure everything in their application is relevant – if it doesn't add anything, leave it out, no matter how much they enjoyed it.
- The more experience gained in a relevant industry during university, the better their chances of getting employed in that area.
- Voluntary work is a great way of taking on responsibility in a chosen field, and often provides more opportunities to do so than in a commercial environment.

How you can help with researching their options

If your son or daughter decides university is the right path for them, there's still a lot of research to do, with over 50,000 undergraduate courses to choose from.

Get online

- Use the UCAS search tool at digital.ucas.com/search to find undergraduate courses at universities, colleges, and conservatoires (collectively referred to as course providers). Each search result lists a summary of the course, how and when to apply, fees and finances associated with the course, and information on the entry requirements the course provider is looking for.

Entry requirements are set by course providers as a guideline of the academic ability students will need, and are usually a mix of qualifications, subjects, and/or exam grades.

It's really important your son or daughter understands the entry requirements for courses they're interested in, so they can make fully informed choices about courses that are right for them.

- Take a look at university, college, or conservatoire websites for in-depth details about their facilities and courses, and explore the campus with their virtual tour at www.ucas.com/virtual-tours.
- You'll also find insider tips and guidance from universities, current students, and teaching experts to help your son or daughter make the right decision for them at www.which.co.uk/universityadvice – covering all aspects of the journey to starting uni.

Get out and about

- UCAS exhibitions are the perfect opportunity to meet universities, colleges, other course providers, and UCAS in person, get your questions answered, and find out what they can offer. Your son or daughter's school may arrange a group visit, or you can choose to go with them yourself. UCAS also runs seminars at the exhibitions, giving you a chance to find out about the

application process, student finance, and much more. The exhibitions are free and there's bound to be one near you – go to www.ucas.com/exhibitions to find one and book your place!

- University and college open days give you the chance to look around, meet staff and students, and see if your son or daughter would be happy living and studying there. They're great for giving you peace of mind that wherever they end up studying, you know your son or daughter will be in a familiar place they're comfortable with. Use the open days search tool at www.ucas.com/opendays to find out when the university they're interested in is holding its next open day.
- Taster courses are tailored to specific courses or subjects, and often include lectures and hands-on workshops to give your son or daughter a feel for what it would be like to study that particular course. You can find them at www.ucas.com/taster-courses.

The UCAS Tariff

The UCAS Tariff is used by universities and colleges to make broad comparisons between qualifications used for entry to higher education. Points are allocated to a wide range of qualifications and can be added together (within certain rules) to give a Tariff score. Some universities refer to Tariff points in their offer conditions.

There's a new Tariff for courses starting from September 2017 – go to www.ucas.com/tariff to find out more.

Considering music, dance, or drama?

If your son or daughter is thinking of a career in music, dance, or drama, they can choose between applying through the UCAS Undergraduate or UCAS Conservatoires application schemes. Both universities and conservatoires offer undergraduate degrees.

TIP:

If your son or daughter isn't sure which type of course will suit them best, they can apply through both application schemes. If they get a place in both, they'll need to decide which to take up.

What does conservatoire study involve?

- A conservatoire is a college that specialises in performance-based courses, but also includes academic study.
- All courses at conservatoires have a strong vocational, performance orientation, and course structures are reflective of the industry.

- If your son or daughter's interests are in a practical discipline, such as vocal performance or dance, they may favour a conservatoire.
- All teaching staff at conservatoires are working professionals. There is a strong emphasis on one-to-one tuition, alongside group work and performances.

The deadlines for conservatoire applications are:

- 2 October 2017 (18:00 UK time) for music courses
- 15 January 2018 (18:00 UK time) for most dance, drama, and screen production courses

There are some exceptions, so check the conservatoires' websites.

The application deadline dates are different to those listed on page 3, so they'll need to carefully check details of courses they're interested in using the **UCAS search tool** from 9 May 2017.

How to apply for conservatoire courses

Your son or daughter can apply for courses at conservatoires through UCAS Conservatoires. Similar to UCAS Undergraduate applications, they'll need to register before they start filling in their application.

For more information and advice about applying to and studying at a conservatoire, go to **www.ucas.com/conservatoires/getting-started**.

Considering teaching?

If your son or daughter is considering a career as a teacher, they need Initial Teacher Education or Training (ITET), based at a university, school, or college in the UK.

How to apply

If your son or daughter is an undergraduate, or a graduate looking for a training programme in Scotland, they will need to apply through the UCAS Undergraduate route.

If they already have an undergraduate degree and are based in England or Wales, they will need to make their application through UCAS Teacher Training.

There are several different ways of becoming a teacher, and it's important your son or daughter does their research to find the route that suits them best.

Each involves:

- a minimum of 24 weeks in at least two schools to give practical classroom experience
- academic study to provide the knowledge and understanding to teach successfully

- tutoring in classroom management
- mentoring from experienced professionals
- an assessment of your son or daughter's teaching skills through observed classes

Head to **www.ucas.com/routes-into-teaching** to find out what the options are, and how to apply to each.

They can train as either an undergraduate, or as a postgraduate if they already have an undergraduate degree.

Point them towards **www.ucas.com/teachertraining** for information on what they need to do, and to sign up for a free information pack, which will help them navigate their way through the postgraduate application process.

Apprenticeships

Apprenticeships are a good way to gain the skills, qualifications, and experience needed to get into many careers. They combine work, training, and study without the fees, letting apprentices 'earn while they learn'.

If your son or daughter is undecided whether to apply for an apprenticeship or uni, they can apply for both at the same time. However, it's important to keep in mind that the deadlines for applying will be different for each option.

What do apprenticeships involve?

Apprentices spend most of the week at work (a minimum of 30 hours), where they focus on learning to do a job.

They learn from colleagues across all levels of the business, typically working closely with someone more senior, who will monitor and review their progress. They will also spend time attending college, university, or a training provider, or training at work.

Apprentices complete assessments during and at the end of the programme, which test both academic learning and occupational competence.

Who are apprenticeships for?

Higher and degree apprenticeships will suit someone who:

- has a clear idea of the type of career they wish to pursue and is willing to commit to a vocational pathway
- wishes to continue with higher education level study, but would prefer a more practical and work-related approach to study
- is ready to start work with an employer and be based in the workplace the majority of the time
- is well organised and able to cope with the competing demands of work and academic study at the same time
- is ready to be assessed through a mix of assignments and written work, including essays, reports, practical exercises, end tests, and exams

What are the benefits?

- Apprentices are employed and paid a wage throughout the course.
- Apprentices will gain a full degree – bachelor's or

master's – without needing to pay student fees. Employers contribute and the remaining funding comes from the government. This means degree apprentices can graduate debt-free, earning a wage at the same time.

- Apprentices will gain a head start in their chosen profession.
- Professional accreditation and membership.

An apprenticeship is not an easy option. Apprentices will be starting a challenging job and trying to prove themselves in the workplace, while getting to grips with studying for a higher or degree-level qualification. They'll be expected to achieve academically and at work, managing their time and adjusting to longer hours, with fewer holidays than at school, college, or university. They might have to travel or relocate to find the right opportunity.

To find out more about apprenticeships, check out:

- apprenticeship information at www.ucas.com/apprenticeships
- the Which? higher and degree apprenticeships guide at www.which.co.uk/apprenticeship

How to fill in the UCAS application

Before they start their application, encourage your son or daughter to look at the short video guide at www.ucas.com/fillinginyourapplication.

First, they'll need to register – it only takes about five minutes to enter their basic details and set up security information. If your son or daughter is applying through a school, they'll be given a 'buzzword' so their application can be linked to their school. If they're applying independently, there will be a few additional questions they'll need to answer. Once they've registered, there are seven sections to complete.

1. Personal details – This will already contain the information they gave when registering, and there will be more questions about student support and where they live.

2. Additional information – If your son or daughter has a UK address, they'll be asked a few equality questions, and details about any preparation they've done for higher education.

3. Student finance – Your son or daughter can sign up to receive an email from UCAS letting them know when they can apply for student finance. See page 4 for more information.

4. Choices – They can make up to five course choices (but only four for courses in medicine, dentistry, or veterinary medicine/science).

5. Education – They'll need to provide a list of all the schools they've been to since the age of 11, including the dates they were there, all their exam results (pass or fail), and details of any exams still to be taken.

6. Personal statement – This is their opportunity to convince the university or college to offer them a place. See page 18 for how to write a personal statement.

7. Employment – If your son or daughter has a part-time job, they should include the basic details here. They can talk more about this in their personal statement.

Your son or daughter can fill in their application at any time, saving their progress as they go. They can go back and edit it until they're happy it's complete. Finally, there's a section for the reference, which is added by their referee – usually their teacher, but this can be an employer or trainer for students applying independently.

What does a school do?

If your son or daughter is applying through a school, pressing 'Send' on their application sends it to their school, not directly to UCAS. Once they have completed their application, there is still a lot for

their school to do. It's therefore really important they don't leave their application to the last minute, as their school won't have time to do their bit, and they could miss the application deadline.

Their school may set an internal deadline which will be much earlier than the UCAS application deadline. This gives them time to check their students' applications to make sure all sections have been filled in correctly, and fully support any student who needs a helping hand with their application.

They will then write and add the reference – this can take a long time to do, as most teachers will have lots of students to write references for, and they'll need to take their time ensuring they do each student justice.

Once references have been added, the school will need to pay for and send their students' applications. They will arrange payment beforehand, so they can do it all in one go.

If your son or daughter doesn't know when their internal deadline is or how they will pay for their application, encourage them to speak to their teacher. They're probably not the only one!

TIP:

In the personal details section of the application, there's the option for your son or daughter to add your name for 'nominated access'. This allows you to contact UCAS – or the universities they have applied to – on their behalf to discuss the status of their application. Just make sure you have their Personal ID handy and can answer basic security questions when you call.

Universities and UCAS are not able to talk to you about the specifics of your son or daughter's application unless you have nominated access.

Help your child write a great personal statement

Your son or daughter may find writing their personal statement the most difficult part of the application process – they are not alone, as everyone finds it hard!

For most applicants, it will be the first time they've had to write reflectively about themselves. Taking a positive approach and leaving enough time to do a good job really can make your son or daughter's application stand out from the crowd.

Help your son or daughter think about what to write and how to structure it with UCAS' personal statement tool.

To try it, go to www.ucas.com/planyourstatement.

Before they start writing, your son or daughter should watch a reassuring video from Jane Marshall – an admissions tutor who reads personal statements for a living – for loads of great advice, hints, and tips on what universities are looking for in the personal statement. You can find the video at www.ucas.com/personalstatement. It's a useful resource for you to watch too!

Encourage them to:

- think about what makes them interesting and what makes them stand out in a positive way

- write down a whole load of words – anything that shows why they're excited about the course(s) they're applying for
- remember why they chose the subject
- list work experience or other activities as supporting evidence to show why they'd make a great student
- think about skills they could use on the course, such as leadership, communication, and time management
- ask you, their teacher, and their friends for ideas and feedback

Pulling it together

Taking all those ideas and structuring them into a perfect personal statement of up to 4,000 characters is the next step. There are four key parts to a good personal statement:

- First part – a punchy opening paragraph showing their excitement for and understanding of the course. What makes them want to study it over any other course?
- Middle part – evidence to

- support their interest in the course. They should include why it interests them, why they're suitable (relevant skills, work experience, and inspirational moments will all sit here), and any activities they've taken part in that demonstrate their interest in the course or subject area.
- Final part – this is where they write about themselves, what they're interested in, and how well they will fit into university life. This could include achievements they're proud of, positions of responsibility they've held, and attributes that make them interesting, special, or unique.
- Closing paragraph – a concise statement which leaves the reader with a clear understanding of why your son or daughter is perfect for the course. If your son or daughter is applying to a more competitive uni, it's worth knowing the uni may get in touch with them after their application is sent to request more information to help with their decision-making.

“I wanted to make sure I fully supported my son during the personal statement writing process. Not only was I able to provide a fresh pair of eyes to check over his many drafts, but I was also able to talk him through all of his positive attributes and help him highlight these in a way that would be beneficial in studying his chosen course.”

“Once she had her first draft, I read through it and supported her with editing it down to a concise statement, and helping with things like grammar and punctuation. She ended up with a personal statement that we both felt was clear, concise, and reflective of who she is and her particular strengths.”

TIP:

A good personal statement:

- is relevant and focused – don't waste the 4,000 characters
- uses clear, plain English
- avoids clichés
- is original – UCAS' software scans all personal statements for plagiarism
- is redrafted multiple times until it's right

“There was a temptation to get too involved and to tell her all the things I thought she should include. Instead, we talked about some of the experiences she'd had that would support an application to history courses, and I directed her to the resources available on ucas.com.”

“As a parent, you have to be positive yet critical!”

Find out more

For personal statement pointers for your child's chosen subject, visit www.which.co.uk/pstips.

Journey of an application

1. Apply online

Find courses in the UCAS search tool. Check entry requirements and application deadlines:

- a) 15 October at 18:00 (UK time) – all courses at the universities of Oxford and Cambridge, and most courses in medicine, veterinary science/medicine, and dentistry.
- b) 15 January at 18:00 (UK time) – the majority of courses.
- c) 24 March at 18:00 (UK time) – some art and design courses.

2. Wait to hear back

- a) Universities or colleges will decide whether to make you an offer. It'll be:
 - unconditional if you've already met the entry requirements
 - conditional if the offer's based on your exam results
- b) If you're not accepted by all five choices, or you decline any offers you receive, you can use Extra to apply for more choices, one at a time.

3. Reply to your offers

Once all the decisions are in, you have to reply to your offers by a specific deadline.

- Select a firm choice – this is your first choice.
- If your firm choice is conditional, select an insurance choice too, if you want – this is a back-up.
- Decline any other offers.

4. Find out if you've got a place

- a) You'll see in Track if your place is confirmed.
 - If your firm choice is unconditional, the place is yours!
 - If your place is conditional, the university or college will update your status when they have your exam results or other evidence that you've met the conditions.
 - You may be unsuccessful if you don't meet the conditions – in this case, you can use Clearing to apply for more courses.
- b) If you do better than you expected, and meet and exceed the conditions of your firm choice, you can look for an alternative course using Adjustment, if you want to.

What happens once UCAS gets their application?

1. Your son or daughter's personal statement is checked to make sure it has not been copied, then all the information in their application is processed. This can take up to 48 hours.
2. They will then be sent a welcome email when the checks are complete. This explains how to use Track to check the progress of their application, and contains their Personal ID, which they'll need to sign in.
3. At the same time, the application is sent to their chosen universities and colleges. Universities won't know where else they've applied.
4. As soon as universities let UCAS know about an interview, audition, test, or decision, your son or daughter will receive an email so they know to check Track.

Types of decisions a university can make

Receiving a conditional or unconditional offer is good news, but it's important to know the difference and commitment they're making if they accept one.

- A conditional offer means your son or daughter needs to meet some conditions – usually exam results – before they secure the place. If they accept a conditional offer as their firm choice, they are

committed to taking up the place.

- An unconditional offer means the place is theirs if they want it. They still might have to meet non-academic conditions, such as a health check. If they accept an unconditional offer as their firm choice (see page 25), they are committed to taking up the place, regardless of what grades they get.
- An unsuccessful application means the university has decided not to offer your son or daughter a place.
- A withdrawn application means the choice has been withdrawn, either by your son or daughter, or by the university. If the university has done this, they'll let your son or daughter know why.

Once they've had decisions from all their choices, your son or daughter can reply to them.

Making changes to their application

After your son or daughter has sent their application, they may need to change their contact details or qualifications. It's really important to keep these details up-to-date so they don't miss any correspondence or deadlines.

- Your son or daughter will need to call UCAS to change their name, qualifications, and

school or college. If their exam details change, they must email qualsupport@ucas.ac.uk as soon as possible, and let their chosen unis/colleges know too. If any of these details aren't correct, your son or daughter's results may not be sent to their chosen unis, causing all sorts of stress and panic on results day.

- They can change their contact details in Track. We'll let their chosen unis/colleges know, but it's a good idea if your son or daughter contacts them too.
- If they want to change their course, the year they'll start their studies, or the point of entry, they'll need to get in touch with the unis/colleges. If they agree to it, they'll let UCAS know. If your son or daughter already has an offer from the uni/college, Track will be updated to show the new details.
- If your son or daughter wishes to change the university or college they've applied to, they can swap one choice within 14 days of the date on their welcome email. If it's within seven days of the date on their welcome email, they can swap the choice in Track – otherwise, they'll need to call UCAS.

Find out more about making changes to their application at www.ucas.com/makingchanges.

Be wary of incentivised offers!

Some unis will offer your son or daughter an incentive (often things like cash, technology, or a guaranteed place in halls of residence) if they accept their offer as their firm choice. Though these offers can sound tempting, it's vital that your son or daughter is making their decision for the right reasons. They don't want to be stuck studying their second favourite course for a few years, wishing they had chosen the course they really wanted to study.

Replying to offers

When your son or daughter has received decisions from all their choices, they'll need to reply to any offers they have. They must be absolutely sure they're accepting the right offer, for the right reasons.

Before they reply, they will need to:

- understand the conditions of their offer – if they're not sure, they should contact the university
- visit the university or college – if they haven't already done so, it's good to check if it's somewhere they'll be happy
- discuss any individual needs with the university – for example, if they have a disability, so everything is in place when they start the course
- check the tuition fees – it's important to know what they are before accepting the offer
- compare their offers to decide which they want to accept and which they don't

What replies can they make?

Your son or daughter can accept an offer as their firm or insurance choice.

Firm choice

- For a conditional offer, they will be guaranteed a place on the course if they meet the conditions.
- For an unconditional offer, the place is theirs.
- In either case, they are committed to that course at that university.

Insurance choice

This has the same level of commitment as a firm choice, but only comes into play if your son or daughter doesn't meet the conditions of their firm choice – it's like a second chance to get a place. It makes sense for the insurance choice to have less demanding conditions than the firm choice.

How can you help?

Narrowing down a potential five offers to decide their firm and insurance choices can be difficult. This is where you can serve as a valuable sounding board for them.

If they're unsure what to do, talk to them about what they want to get out of a course and their university experience. Has this changed at all in the last few months? How do these offers line up with their goals or preferences?

If they've already decided on their firm and insurance choices, ask them why. If they seem a bit unclear or haven't considered some key factors, it could throw up the need for a second think.

Remind them their firm choice should be their first choice. Ask them if the offer is achievable, and if there is any flexibility if they don't get the grades they were expecting.

Their right to change their mind

The UCAS application process complies with consumer law and the Competition and Markets Authority's advice. This means that after they've sent their application to UCAS, your son or daughter has 14 days in which to cancel their application and receive a full refund, should they wish to do so.

When they've replied to their offers, they have 14 days in which they can change their replies, but can only do so once.

Decline by default

Your son or daughter will have a deadline to reply to the offers they receive, which depends on when they received the last one. The table below shows the official deadline dates, but it's really important they check Track to see their personal deadline.

If they don't reply to their offers by their deadline, any offers they have will be automatically declined on their behalf – this is called decline by default.

Last decision received on or before...	Means their reply date is...
31 March 2018	2 May 2018 (if their postal address is in the EU)
3 May 2018	7 June 2018
8 June 2018	21 June 2018
12 July 2018	19 July 2018

Preparing a plan B

Things don't always work out as expected, so it pays to spend time devising some alternative plans with your son or daughter.

Competition can be tough, meaning even the best students don't always get the offers they'd hoped for. Alternatively, they might receive offers for courses they're no longer interested in. So what can they do instead?

Setting early expectations

Try to gauge how things have gone. While they can't anticipate everything, they should have a

rough idea based on how their exams and assignments went. This can be helpful to determine whether it's a back-up plan or complete alternative that's needed.

Near miss on their grades

Think positively. Even in the event they don't achieve the grades they were expecting or needing, your child's firm choice university may still accept them.

An alternative uni course

If they do miss out on their place, UCAS' Clearing service (see page 29) offers students the chance to apply for alternative courses. Start preparing now by encouraging them to revisit the original courses they considered – a good way to get them back into a researching mindset and provides a ready-made shortlist of universities and courses.

Extra

Extra is an opportunity for your son or daughter to look for another course without waiting for Clearing (see page 29). In the last five years, **40,320** people have secured a place at university or college using Extra.

It doesn't cost anything, but in order to use Extra, they must first be eligible:

- All five choices must have been used.
- They must either have no offers, or have declined any offers they received.

Extra opens on 25 February 2018 and ends on 4 July 2018.

For more details, go to www.ucas.com/extra.

A year out

They may wish to reapply next year for slightly different courses or universities. Now is a good time to start thinking about what a productive gap year would look like, to make sure they get the most out of it.

Retakes

Depending on their results, they might also decide to resit a subject before reapplying. This means more exams next summer, finding somewhere to sit them, and probably some extra tuition.

Better than expected

If your child has high hopes for results day, there's the option to 'trade up' their place through UCAS' Adjustment process (see page 29) to gain an offer on a course with higher entry requirements. Use the time now to research potential courses.

An alternative path

Studying abroad might be a viable alternative – there may even be vacancies available on English-speaking courses at certain European unis. What about a different qualification entirely, or entering the world of work instead?

Which? University has more tips and advice to help your son or daughter get set for results day – head to www.which.co.uk/resultsday.

It's strongly recommended that your child is in the country for results day, so avoid booking any holidays around that week in August. This way, should they need to speak to someone about their results or options on the day, they can do so. You might want to be around, too!

Re-marks and appeals

If your son or daughter ends up unhappy with an exam result and feel it's been unfairly marked, they should first talk to their school or college about appealing the grade (they won't be able to enquire directly with the examining board themselves).

They will also be able to advise you based on outcomes for that exam across your son or daughter's year group. Head to www.which.co.uk/appeals for step-by-step advice on the grade appeals process.

Getting exam results

Results day can be stressful, so make sure your son or daughter knows how it works and what to expect.

- UCAS receives exam results, matches them to applicants, and makes them available to universities and colleges.
- Universities then check the offer details and confirm the conditions have been met.
- If the university has confirmed their place, this will be shown clearly in Track.

There is restricted access to Track in the lead-up to Scottish (SQA) results, and A level results day while UCAS processes results – details of when it's available will be clearly displayed on ucas.com.

Getting their results

UCAS doesn't send exam results to applicants – they come from the exam board, either via their school, by post, or online.

UCAS sends some results on to universities or colleges, but not all of them. Check if your son or daughter needs to send any of their results to their firm and insurance choices. If they do, they'll need to do this as soon as the results are available. You can check which results UCAS receives at www.ucas.com/sending-exam-results.

Try to be there when they get their exam results, so you can share in their excitement, or give them that extra bit of support if things don't go as planned.

What if there's really good news?

When their results are announced, your son or daughter could achieve higher grades than the conditions of their firm offer. If this happens, they may be able to swap their course for another one if they want to.

Make sure your son or daughter's contact details are up-to-date in Track, including their address, email, and mobile phone number.

What if they don't get the grades they were expecting?

- The university might still accept them, but there's no guarantee.
- They might offer your son or daughter a place on another course, or for a different year of entry.
- Your son or daughter could use Clearing, or reconsider their options.

Clearing and Adjustment

Clearing is a chance for students to look for a place if they don't have one after they get their exam results. It's also the final chance for universities to fill any places they still have available.

To look for a Clearing place, your son or daughter must be eligible. This means that either:

- they have no offers
- their firm and insurance choices have made them unsuccessful
- they applied after 30 June 2018 (see page 2)

If your son or daughter only applied for one choice, they will need to pay an additional £11 to apply for a course in Clearing. They can do this in Track.

Clearing officially starts on 5 July 2018. However, students must have all their exam results to be able to use it, so the majority of eligible students will use Clearing in August. To find out more, go to www.ucas.com/clearing.

Adjustment

If your son or daughter's results are better than expected, they might exceed the conditions of their firm choice. In this situation, they may wish to look at Adjustment to find an alternative course.

Adjustment is available between 16 and 31 August 2018, but applicants only have five days to use it, from the moment their firm choice confirms their place, or from 16 August, whichever is later.

If they don't find an alternative course they like, they will keep the original place they gained on results day. For more information, go to www.ucas.com/adjustment.

UCAS' direct contact service

UCAS' direct contact service is designed to help your son or daughter find a university or college place, if they don't have one.

It's an optional service and if they sign up, universities and colleges can contact them from the end of February until mid-September, if they have places on courses they think might be suitable.

Who can use it?

Your son or daughter can sign up to this service when they've applied, but they will only be eligible to use it if they:

- are not waiting for any university decisions
- haven't accepted an offer from a university or college, and are eligible for Extra or Clearing, depending on the time of year
- have paid the full £24 application fee
- have submitted their application by 30 June
- have, or will have, A level, SQA, BTEC, IB, or Access to HE qualifications

How does my son or daughter sign up?

UCAS will send them an email asking if they'd like to sign up to this service. They can sign up through the link in that email.

Will they definitely be contacted by universities if they sign up?

Not necessarily – universities will only contact applicants if they think they have places they'd be suitable for, based on the information in their application. Your son or daughter may not be contacted at all. It's really important that they contact universities in Extra and Clearing as normal, to maximise their chances of getting a place.

How does it work?

If a university has a course they think your son or daughter may be interested in, they will contact them to discuss the options available. If they make an offer, your son or daughter will be able to tell them whether or not they'd like to accept it. If they do accept the offer, they can then add it in Track.

If they've signed up to use the service and don't have a place after they've received decisions from all of their choices, your son or daughter may receive phone calls from universities from the end of February until mid-September. They may continue to be contacted until they have secured a place, unless they decide to opt out by changing their preferences.

Instructions on how to do this are in the email UCAS sent them about the direct contact service.

Please be aware that, because of the time it takes to process some information, some universities may contact your son or daughter shortly after they've secured a place. If this happens, they will need to let them know they already have a place on a course.

What information will universities see?

The universities and colleges will be able to see key information from your son or daughter's UCAS application. This includes information such as their name and contact details, qualifications, personal statement, and original choices from their application. This information will help unis decide if they have a place on a course that could be right for your son or daughter.

Can they choose which universities will receive their application?

It's not possible to choose which universities and colleges will receive their application, and not all of them will be using this service.

Find out more at www.ucas.com/direct-contact-service.

Finding university accommodation

The next big decision is choosing where they're going to live.

If your child has their heart set on university halls, they'll need to do their research and apply early – it's not always guaranteed that everyone will be allocated a place. Encourage them to think about the alternatives – they can be an equally fun and safe environment to live in.

University halls

The traditional option for first year students, these are managed by the university and offer a good stepping stone from living at home to living independently. There's a huge range of types, sizes, and locations, so ask the right questions to help your child find the right one.

Private student halls

A second option in some areas is a room in a purpose-built student living complex. The set-up is similar to university halls, but it's owned by a private company. Factor in what bills are included, what facilities are on site, and how far they are from campus.

Private accommodation

A good option for mature students and those who missed out on halls because they applied late or through Clearing (but it can be a big leap from living at home).

Staying at home

It can work out well for students to continue living at home – as long as you're happy for them to stay! They may need to make more effort to get out and socialise to meet other students, but they'll save money and avoid the hassle of moving.

Questions to ask about university halls

Try to see one or two halls of residence on an open day – you'll probably be taken to the best on offer, but it's a great time to do some fact finding. Consider the following questions:

- Is a place in halls guaranteed? What accommodation is available off-campus?
- Would a place still be guaranteed if the uni is your child's insurance choice?
- What does it cost and what's included in that cost?
- Do students have to move in and out each term?
- Are they catered or self-catered?
- How big are the rooms? Are some bigger than others?
- How quiet are they?

- Can you put stuff on the walls?
- How secure is it?
- What happens in years two and three?
- How far will you have to travel to get to uni and around town?
- Can you bring a car?
- How close is it to lecture halls, town, etc.?
- Does the university have a dedicated housing service for finding accommodation on and off-campus?

What do they need to pack?

Must-take items

Clothes: don't pack everything! Enough for that term will do.

Bedding: duvet, sheets, pillows, and towels.

Bathroom: toiletries, glasses, contact lenses, medication, and a small first aid kit.

Laundry: washing products, laundry bag, and drying rack.

Electronics: laptop, tablet, printer, extension leads, and chargers.

Kitchen: cutlery, crockery, glasses, pots, pans, plus basic gadgets such as a kettle and toaster, if these won't be provided (check with the accommodation first).

Admin: passport, driving licence, NHS medical card, National Insurance number, and all important correspondences with the university.

Food basics: coffee, tea bags, cereal, cooking oil, tins, and condiments.

Things to leave behind

TV and games console: encourage them to get out and meet people, not barricade themselves indoors.

Stationery and books: apart from the books they'll need for the very start of term, they can buy the majority once they arrive.

Posters and décor: aside from some special extras to help remind them of home, your child can personalise their room once they're settled in.

Bills, budgeting, and preparing for uni

For many students, uni will be the first time they will have budgeted and paid for bills. Start planning now to make sure they know what to do.

Student bills

Council tax – if everyone living in your son or daughter's household is a full-time student, they won't have to pay council tax. If someone in their household isn't a full-time student, they'll get a council tax bill, but will qualify for a discount.

Utility bills – if your child is moving into private accommodation, utility bills may not be included, so make sure they're aware of gas, electricity, and water bills.

Internet – probably a priority for your child! Many universities offer a free wireless connection in halls, so be sure to ask.

TV licence – students need a TV licence if they watch or record television programmes as they're being shown on TV, on any device – this now includes the previously exempt BBC iPlayer catch-up service. Halls of residence usually have a licence covering communal areas. You don't need one to use a streaming service such as Amazon Prime or Netflix (but a subscription may be required).

Insurance – check the small print of your home contents insurance, which may already cover your child's belongings when away

from home, or see if this could be added on to your existing policy. If not, it may be worth getting them a separate policy.

Budgets and bank accounts

By now, you and your child should have a good idea of their budget per term. Give them some tips for cutting their living costs and the tools to stay within their budget – a simple weekly expenditure spreadsheet could work wonders here!

Opening a student bank account before they head off is also a good idea, so they can take their time over comparing what's on offer. UCAS will send your son or daughter a status code in their monthly newsletters, which can be used as proof of their status as a future student, to make the process of opening a student account quick and easy.

Banks are keen to entice students with freebies, but do look beyond student railcard or voucher incentives. Often it's features such as the level of interest-free overdraft that may prove more essential in the long-run. When you're comparing 0% overdraft facilities on offer, check whether the headline amount is guaranteed, or just 'up to', and if there are any other restrictions.

For a comparison of student bank accounts, great value gadgets, and more advice on how to prepare them for uni, head to www.which.co.uk/preparingforuni.

Teach them some independence

Spare your child some domestic disasters (and yourself some frantic messages or phone calls) by teaching them some simple recipes, how to do laundry without turning everything pink, and handy extras like how to sew a button back on.

Encourage your child to see an overdraft as a helpful buffer rather than extra cash, and to always stick within their authorised limit to avoid hefty charges. Likewise, warn them of the pitfalls of high interest sources of credit, such as payday loans or credit cards.

Prepare yourself too!

It's not all about them! This is a big change for you as well. Talk to other parents whose homes are also a bit quieter since their kids have left for university.

Think about what you'd like to do with your extra time – perhaps taking up a hobby you've been putting off, or spending more time with friends and other family members.

The end of their first term will come around before you know it...

Useful resources to help you

Which? University's website is packed with information and advice on how best you can support your child during this time.

Access articles, videos, and tools, including the **A level explorer** to see which paths different A levels can take your son or daughter down. Plus, keep up-to-date with the essentials you need right now by signing up to emails, or following Which? University on **Twitter** or **Facebook**.

I found the Which? University website really useful when supporting my son in the decision-making process. We particularly liked the A level explorer tool, it was a fun and quick way of helping him see the different courses and career paths which were open to him."

There are many ways you can get help from us on **ucas.com**:

- **Sign up for parents' newsletters.**
- **Watch video guides** – including a series of 90-second parent guides, and more.
- **Read parent blogs.**
- **Download the UCAS news app.**

You can call UCAS on 0371 468 0 468, Monday to Friday, 08:30 – 18:00 (UK time), or drop us a question on **Facebook** or **Twitter**.

If your son or daughter currently lives outside the UK, you might find UCAS' 'International undergraduate guide for parents' a useful read. You can download the guide at **www.ucas.com/internationalguides**.
